Skills

Experience

Education

**UI/UX**  
Designing Web/App interfaces

**Web development**  
Web app development

**App Development**  
Building Android/iOS apps

## My Services

### Web Design

Web design refers to the process of designing and creating websites. It encompasses a variety of skills and disciplines, including graphic design, user interface design, coding, and search engine optimization. The goal of web design is to create visually appealing, easy-to-use websites that provide a positive user experience. Web designers often use tools such as HTML, CSS, and JavaScript to create and style web pages. They may also use content management systems (CMS) such as WordPress or Drupal to build websites more efficiently.

## About Me

Hi there, I'm Ahmad Alshlyyab, and I'm a programmer. I have always been fascinated by technology and the endless possibilities it offers. My passion for programming began when I was young, and I started learning basic programming concepts in school. As I continued to learn more about programming, I realized that I wanted to pursue it as a career. Over the years, I've developed a wide range of skills in different programming languages and frameworks. I enjoy working on challenging projects and finding creative solutions to complex problems. I believe that good programming requires a combination of technical expertise, critical thinking, and strong communication skills.
